

TabNine information

Version	2.1.11
Configuration path	/home/akhil/.config/TabNine/tabnine_con
Executable path	/home/akhil/.vscode/extensions/tabnine.t
Activated	No

*Error saving your changes: there was an error contacting tabnine.com:
https://api.tabnine.com/api_key_info/v1: timed out*

Activation key

mhwfhjhpipbuoubnyzdwqdkkfdraaa

You can get a free activation key [here](#).

TabNine Local

TabNine Local uses your machine's CPU to run a deep learning model for providing completions. Your code stays on your machine.

- Enable TabNine Local
- Disable TabNine Local when on battery power

Retrieving model metadata...

TabNine Cloud

Enabling TabNine Cloud sends your code to TabNine servers to provide GPU-accelerated completions. Your code is deleted from our servers

after your query is fulfilled.

You can get a free activation key for TabNine Cloud [here](#).

Settings

- Update TabNine automatically
- Receive beta releases of TabNine
- Hide messages about upgrading to increase index size limit
